

5/28/04

Dear FCC officials,

Would you please let industry and our "free" market give us what we're willing to pay for, especially if it's decent, respectable and helpful!!! So it costs us more than the average radio programming - but the quality is sooooo much better, broader, deeper and I'm willing to pay for it.

It's obvious that the big networks are bipartisan with the FCC politicians because its notable that the quality of programming has decreased so much - you guys have to earn your keep too, you work for us, not them!!!!!!!
